

Underground Articulated Truck From Norscot Expands Line of Mining Scale Models

The new Cat[®] AD45B Underground Articulated Truck die-cast scale model, the second notable low-profile mining industry replica from Norscot, offers impressive detail and realistic features.

“This underground mining truck model is a superb complement to our previously introduced Cat R1700G LHD Underground Mining Loader,” said Scott Stern, Norscot’s president and chief executive officer.

The real Cat AD45B truck is designed for high production and low-cost-per-ton hauling in underground mining operations. Likewise, the AD45B die-cast model offers high detail at a popular price. Features of the 1:50 scale model include:

- Articulated hitch
- Truck bed raises and lowers
- Clear windows and interior cab detail
- Rolling wheels and tires with authentic tread design

Item Number 55191 is 8-3/4 inches long, 2-3/8 inches wide and 2-7/8 inches tall (22.23 x 6.03 x 7.30 cm).

Caterpillar models made by Norscot are available at participating Cat dealers and at retailers throughout the world.
